Practical Computer Training

First Graduation

"We help streamline SMME's"

Sianne King (Practical Computing); Sifiso Mncube (Foskor group manager: BEE and Supplier Development); Leslie Shadrach (Izulu Engineering); Sfaniso Goba (AmaGoba Trading cc); Michelle Calasse (All Good Things Engineering); Blessing Mtshali (Mnguni Development Projects); Cebile Ngema (Khazimula Catering); Thamsanqa Sibiya (Bizathina Technologies); Amahle Ntuli (Sompisi Construction); Kumaran Poonan (Practical Computing); Khetho Gumede (Superintendent: BEE and Supplier Development)

A Richards Bay-based training group, Practical Computing, facilitates small businesses towards reaching their potential.

With more than 20 years combined experience in the business and computer industry; Kumaran Poonan from Spectrum Technical and Sianne King of Integrated Business Systems has developed a niche in providing affordable basic business computer skills to small and medium enterprises.

Foskor selected seven BEE companies to attend the course last week, to improve their business image and relations.

Programme facilitator, Sianne King, said the purpose of the course is to empower business owners.

"We train delegates on matters such as basic computer skills, using open source software in a business environment and we provide them with a Business Essentials System, on which they can do professional quotations, purchase orders, invoices and business documents" said King.

Business partner, Kumaran Poonan, said that besides the training aspect, the BEE companies receives personalised company email addresses, a website and a CD containing most of the software tools needed in

a business environment.

"What makes our concept unique is that the course is focussed purely on the business aspects of using a computer; it is practical and the delegates can apply the content in their businesses immediately" said Poonan.

Foskor group manager for BEE and Supplier Development, Sifiso Mncube, said that he hoped to improve business relations with the SMME's in the near future.

"This course has empowered you further to do business with Foskor. I am looking forward to receive a quote from you," said Mncube.
